Fire Rated Door Edge Guards

Fire Rated Door Edge Guards are fitted with intumescent fire and smoke seals which are vandal-resistant yet easy to replace. These profiles are ideal for maintaining the integrity of the fire door and can be used on the front and back edges of fire resisting door sets.

Standard finishes are Satin Anodised Aluminium (SAA) or standard PVC-u colours available from the SureProtect Endure range. This helps to provide colour and tonal contrast to door edges to aid the visually impaired and to meet the guidelines in BS 8300-2:2018 and Approved Document M. Profiles are available with a choice of seals dependent on application (brush, neoprene blade or blank intumescent).

(Supply only, usually installed by a door specialist)

Information

> Fire tested to BS 476: Part 20 & 22 for 30 and 60 minutes

> Reduces maintenance costs and protects vulnerable entry areas

Aluminium

Aluminium: profile designed for doors (single or double doorsets) where there is the need to cut around the locks, latches and hinges.

PVC-u

PVC: radius profile designed for doors (single or double doorsets) where there is the need to cut around the locks, latches and hinges.
