

Floor Maintenance & Cleaning Specification

Noppe Stud Tile Flooring

General Guidelines:

After installation, allow the flooring to cure for a minimum of 48 hours before carrying out the initial construction clean. Regular and correct maintenance will significantly extend the life, appearance and hygiene of the flooring.

NOTE: An effective entrance matting system is strongly recommended to minimise dirt ingress and reduce long-term wear.

Post Installation & Deep Cleaning:

Step 1:

- Remove all dust, grit, sand and debris using a vacuum cleaner or disposable sweeping cloth system such as Masslinn® or a mop sweeper frame.
- Prepare a solution of Prostrip diluted according to the manufacturer's instructions.
- Scrub the floor using a Dual Speed Single Disc fitted with a scrubbing brush.
- For edges and difficult areas, use an edge cleaning tool fitted with a Blue Doodlebug Pad.

Note: Only use a Blue Pad when stripping the floor. The floor should be double checked for any remaining polish and should be restriped in these areas if necessary.

Recommended Products:

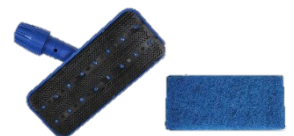

Masslinn Tool &
Masslinn Cloths

Prostrip Floor
Stripper

Machine & 3M Blue
Pad

3M Blue Doodlebug
Pad

Step 2:

- Vacuum the dirty solution using a Wet & Dry Vacuum Cleaner.
- Thoroughly rinse the floor with clean water to remove any chemical residue.
- If machinery is not available, remove solution using a flat mopping system, changing water frequently to ensure full neutralisation.

NOTE: Floor must be completely clean and residue-free before applying any dressing.

Recommended Products:

Vileda Microfibre Flat
Mopping Unit

Wet & Dry Vacuum
Cleaner

Application of Floor Dressing:

- Ensure the floor is fully deep cleaned, dry and free from contaminants prior to sealing.
- Apply 2–3 thin coats of Proflor HD in accordance with manufacturer's instructions.
- Apply evenly using an applicator or Unger Wonder Waxer to prevent over-application.
- Allow each coat to dry fully before applying the next.

Recommended Products:

Unger Wonder Waxer
Applicator

Proflor HD Floor Sealer

Notice to purchaser: Industroclean (Pty) Ltd's only obligation shall be to replace such quantity of the product(s) supplied proved to be defective. The methods and products described above are recommendations only. Therefore, the user assumes all risk and liability with the methods and use of products described in this document.

Daily Maintenance:

1. Frequency of cleaning depends on traffic intensity.
2. Sweep or dry vacuum daily to remove loose dirt.
3. Spot mop spills promptly using clean water and allow area to dry.
4. At least once per week, mop using Proclean diluted as per manufacturer's instructions.
5. Where a shine is required, buff using a Dual Speed Single Disc Machine fitted with a 3M Red Buffing Pad and Probuff.

Note: Regular buffing will enhance and maintain the appearance of studded rubber flooring.

Periodic Cleaning

1. Scrub the floor using Proclean diluted according to manufacturer's instructions.
2. Allow approximately 10 minutes contact time.
3. Strip using a Dual Speed Single Disc fitted with a 3M Blue Pad (work in sections of $\pm 10m^2$)
4. Use edge tool with Blue Pad for detail work.

Note: Only Blue Pads must be used for stripping.

Purpose Cleaner

Step 2:

- Vacuum dirty solution using Wet & Dry Vacuum Cleaner.
- Rinse floor thoroughly with clean water to neutralise.
- If mopping manually, change water frequently to remove all residue.

Note: Floor must be fully neutralised after stripping.

Cleaner

Vileda Microfibre
Flat Mopping Unit

Cleaning of Equipment:

1. All machinery and tools must be cleaned immediately after use.
2. Pads must be rinsed or vacuumed depending on soiling.
3. Single disc machines should be wiped with a damp cloth and disinfected if required.

Note: Cleaners and detergents must always be diluted according to manufacturer's instructions. Always follow Health & Safety guidelines when handling chemicals. Polyflor reserves the right to make product changes without affecting performance. Regular cleaning is more beneficial and cost-effective than infrequent heavy cleaning.

For more information on the above cleaning methods please contact us on 011 801 4600 or info@industroclean.co.za.
