

Floor Maintenance & Cleaning Specification

Polyflor sports 67

General Guidelines:

Polyflor Sport 67 is a high-performance, heavy-duty, multi-use sports floorcovering with a polyurethane reinforcement designed for lifetime polish-free maintenance.

Recommended for:

- School sports halls
- Gymnasias
- Leisure centres
- Local authority facilities

The floor meets Sport England requirements and is suitable for multi-use sporting activities including football, netball, basketball, volleyball, tennis and badminton.

Once installation is complete, do not traffic for 24 hours to allow adhesive to cure.

NOTE: Installation of an effective entrance/barrier matting system is essential to protect the surface and reduce maintenance costs.

Post installation & Deep Cleaning

Step 1:

- Remove all dust, grit, sand and debris using a vacuum cleaner, Masslinn® disposable cloth system or mop sweeper frame.
- Prepare a solution of Proclean Neutral Detergent diluted at 100ml per 10 litres of water.
- Scrub the floor using a Low Speed Single Disc Machine fitted with a 3M Blue Buffing Pad.
- For edges and corners, use an edge cleaning tool with Blue Pad.

Recommended Products:

Masslinn Tool
& Masslinn
Cloths

Proclean
All Purpose
Cleaner

Dual Speed
Single Disc
Machine

3M Blue Buffing Pad

Daily Maintenance

For high traffic or heavily soiled areas the floor can be deep cleaned periodically:

1. Mop sweep or vacuum to remove dust and loose dirt.
2. Spot clean stubborn marks using Proclean diluted at 100ml per 10L of water.
3. Rinse thoroughly after use.
4. Damp mop entire area using a Vileda Microfibre Flat Mopping System with Proclean.
5. Where required, buff with a Dual Speed Single Disc Machine fitted with a 3M Red Buffing Pad to restore finish.

Recommended Products:

Proclean
All Purpose
Cleaner

Vileda Microfibre
Flat Mopping Unit

Dual Speed Single
Disc Machine & 3M
Red Buffing Pad

DR1500 Burnisher
& 3M Pink Pad
(For large spaces)

Periodic Cleaning:

1. Machine scrub using an Autoscrubber fitted with a 3M Blue Pad and Proscrub diluted at 500ml per 10 litres.
2. Rinse thoroughly with clean water and remove residue.
3. Buff using Dual Speed Single Disc Machine with 3M Red Buffing Pad.

Recommended Products:

Autoscrubber

Dual Speed Disc Machine

3M Blue Buffing Pad

Removal of Stubborn Black Heel Marks:

- Use single disc with a 3M Blue Doodlebug Pad and a small amount of undiluted Proflex.
- Rinse area thoroughly with clean water and allow to dry.

Recommended Products:

Proflex Heavy Duty Cleaner

Dual Speed Single Disc Machine

3M Doodlebug Pad + Edge Tool

Cleaning of Equipment:

1. Clean all machines and tools immediately after use.
2. Rinse pads thoroughly and allow to dry.
3. Empty and rinse tanks of scrubber dryers daily.

Note: Cleaners and detergents must always be diluted according to manufacturer's instructions. Always follow Health & Safety guidelines when handling chemicals. Polyflor reserve the right to make product changes without affecting performance. Regular cleaning is more beneficial and cost-effective than infrequent heavy cleaning.

For more information on the above cleaning methods please contact 011 801 4600 or info@industroclean.co.za.
