

Floor Maintenance & Cleaning Specification

PUR Safety Vinyl Flooring

General Guidelines:

PUR Safety Vinyl Flooring is manufactured with aggregates throughout the product to improve traction and safety underfoot. The product features a high quality cross-linked polyurethane reinforcement and should not be sealed.

NOTE: We highly recommend an effective barrier/entrance matting system to reduce the dirt tracked into the building.

Daily Maintenance:

1. Remove all dust, sand and stones from the floor using a vacuum cleaner.
2. Spot mop wet sticky dirt using a **Vileda Spray Pro Inox Mop**, a **Filmop Puli Scrub Mop*** and the correct dilution of neutral detergent such as **Proclean**.
3. For larger areas, the floor can be washed using a **Nilfisk Automatic Scrubber-Drier**, **Prolene Brush** and **Proslip** low foam neutral detergent.
4. For kitchens, a food safe chemical such as **Diner-gen** degreaser should be used for mopping and/or scrubbing.

*The Puli-Scrub Mop has nylon inserts which allow it to glide easily over safety floors.

Recommended Products:

Detergent

Diner-gen
Food safe
Degreaser

Viper Low Speed
Scrubber &
Prolene Brush

Nilfisk Autoscrubber
with Prolene Brush

Periodic Cleaning

For high traffic or heavily soiled areas the floor can be deep cleaned periodically:

1. Remove all dust, sand and stones from the floor using a vacuum cleaner.
2. Scrub the floor using a **Low Speed Scrubber** fitted with a **Prolene Brush**.
3. For light to medium soiling, a solution of **Proclean** neutral detergent can be used for scrubbing. For heavily soiled areas, **Proflex** diluted according to manufacturer's instructions can be used. For detail work, a hand brush with prolene bristles can be used.
4. Vacuum the dirty chemical solution from the floor with a **Wet & Dry Vacuum Cleaner**.
5. Rinse the floor thoroughly with clean water to remove any remaining chemical residue.
6. If no machine is available, remove the solution from the floor using a mop and mopping system. The water and mop must be changed frequently so as to remove as much of the chemical residue as possible.

Note: Only a Prolene brush should be used to scrub the floor.

Recommended Products:

Viper Wet & Dry
Vacuum Cleaner

Proclean
Neutral
Detergent

Proflex
Degreaser

Viper Low Speed
Scrubber &
Prolene Brush

Cleaning of Equipment:

1. All equipment should be cleaned thoroughly after use.
2. Pads should be rinsed or vacuumed depending on soiling.
3. Single disc machines must be wiped with a damp cloth and disinfectant if needed.

For more information on the above cleaning methods please contact 011 801 4600 or info@industroclean.co.za.
